Example Download (Windows 10)

Step 1:

Create Windows 10 installation media

To get started, you will first need to have a license to install Windows 10. You can then download and run the media creation tool. For more information on how to use the tool, see the instructions below.

[Download Now](#)

Step 2:

After running the downloaded MediaCreationTool.exe file, it will get some things ready, then have you accept terms and conditions, get some more things ready, and then ask what do you

want to do. If you downloaded to the computer you want to upgrade, use the “Upgrade this PC now”, click Next, and follow the on screen instructions and you will not need to create any installation media.

 Windows 10 Setup

## What do you want to do?

- Upgrade this PC now
- Create installation media (USB flash drive, DVD, or ISO file) for another PC

## Step 4:

The USB flash drive must be at least 8GB and will be completely overwritten.

The ISO file must be burned to and run from a DVD supporting 8GB of data (dual layer).

## Choose which media to use

If you want to install Windows 10 on another partition, you need to create and then run the media to install it.

USB flash drive

It needs to be at least 8 GB.

ISO file

You'll need to burn the ISO file to a DVD later.

Step 5:

# Select a USB flash drive

The files on your USB drive will be deleted. To keep these files, back them up now to another save location.
